

Blue EPDM sealing washer

Hygienic Usit®

RDE-BHUSS

- Sealing washer for Hygienic Usit® screws
- Flat metal gasket with elastomer bead for cavity-free, static sealing of screwed connections.
- Material:
 - Stainless steel 1.4404 (316L)
 - Rubber seal: 75 Fluoroprene XP 45, blue

Advantages

- The sealing washer ensures there is no risk of any cavities within a screwed connection.
- Residues or cleaning liquids cannot settle unnoticed thus avoiding any contamination by germs or bacteria.

Use

- Even if, when tightening the screw connection, the elastomer bead cannot be overloaded by the integrated stainless-steel washer, any material will arrive sooner or later at the end of useable life. Fragments could then be found in foodstuffs.
- The sealing materials used and the colours used make it easy to detect these unwanted elements.

Applications

- For special requirements, such as very greasy and corrosive liquids or very high temperatures, which can occur for example, during cleaning operations.

Warning

- The Hygienic Usit washer cannot guarantee a cavity-free watertight screwed connection unless it is used with screws or nuts from the Hygienic Usit® range.

For hostile environments
